Product Handbook

# How To Use Clip-n-Seal

**Fold bag over rod.** For maximum freshness, position rod near the contents of the bag.

**Attach clamp to top of rod,** capturing the bag between the rod and clamp.

**Revel in the freshness!** Your seal is air- and watertight. To remove, simply pull the pieces apart.

## Snap it Together, Pull it Apart

Clip-n-Seal's rod-and-clamp design is easy to use, sturdy, and nearly unbreakable. The soft plastic and ergonomic shape provides a comfortable gripping surface to easily clip the pieces together and pull them apart. You get a perfect seal every time. Clip-n-Seal works by forming an air- and watertight seal when a bag is closed between the rod and clamp. The food stays fresh because it's not exposed to air.

## It Just Works Better

Clip-n-Seal works better than other bag clips because it actually reseals the bag. Bag clips just hold food in the bag. They are bulky, can break, and do not close tightly enough. Clip-n-Seal's unique design is patent pending.

## Versatile Money Saver

Clip-n-Seals are sized to fit nearly every packaged food bag. They can be used for chips, cereal, frozen food, coffee, spices, trail mix, or anything else that needs to be kept fresh.

Clip-n-Seal is ideal for outdoor activities: road trips, backpacking, or cycling tours (our favorite). It's reusable, washable, and practically indestructible.

## Unexpected Uses

Not only do our customers love Clip-n-Seals, but they also use them in unexpected ways:

- Chemicals – used in laboratories and medical tests.
- Dairy – used in the milk production process.
- Pet foods – used on natural pet food bags.

## Satisfaction Guaranteed

Clip-n-Seals are guaranteed for life. If for any reason it fails or you are dissatisfied, just return it for credit or an exchange.

Our guarantee does not cover abuse or misuse of the product. For example, if you drop it in a campfire while unsealing a package of marshmallows; well, we'd be happy to sell you another one!

## Size Guide

Size	Length	Example Uses
Large	12.6" clamp, 14.1" rod	Large chip bags, pet food, bulk-size foods & dry goods
Medium	8.6" clamp, 10.1" rod	Cereal, packaged foods, small chip bags
Small	5.1" clamp, 6.6" rod	Coffee, spices, tea, chocolates

## Cut-to-Size Guide

It's easy to cut your Clip-n-Seals to size. The sizes above include the most popular bag sizes, but you can cut them to any size you desire. For each size, the rod is 1.5 inches longer than the clamp. (The extra length is for holding the rod when pulling it apart.) We recommend pruning shears for cutting Clip-n-Seals and please be very careful when cutting the pieces.

## Cleaning

To clean Clip-n-Seal, just throw it in the dishwasher or in the sink with soap and water

## Lost Pieces

If you lose a rod or clamp and need a complete Clip-n-Seal, please return the piece you have to us, with \$2.49 for postage, and we'll send you a replacement Clip-n-Seal at no charge.

## Let Us Know What You Think

We read and respond to every email message and consider all suggestions. So if you've got an idea, questions, concerns, or just want to let us know what you think, send us a message. We'd love to hear from you: [info@clip-n-seal.com](mailto:info@clip-n-seal.com)

Clip-n-Seals are made in the USA.
